

October 2017

Hi,

In the past few weeks we have had lots of visitors here at Highcon headquarters in Israel. It's been really interesting and enlightening for us to hear and learn about the challenges facing printers and converters from all over the world. We've been proud to show off what the Highcon Euclid and the Highcon Beam can do to streamline the finishing process.

Ilan Print

One of our recent installations, here in Israel, has been at Ilan Print, a print shop well-known for innovation and rapid turnaround. Read more about what they are doing with Highcon technology here.

"The Highcon Euclid III offers us true versatility; the ability to extend the already wide range of commercial applications we offer our customers. The machine will not only complete an all-digital flow from our HP Indigo 10000 digital press but will also support our offset printed pieces on B2/30in. sheets and allow us also to produce highly differentiated pieces on unprinted B1/40 in. stock. Together with the Highcon Axis the service we can now offer our customers is incomparable".

Executive Summary
 Established in 1963, Ilan Print Ltd. is a commercial printing company that specializes in offset and digital printing with web-to-print and JDF applications. Their number one focus is to deliver a standard of quality, creativity and responsiveness second to none.
 Their reputation for innovation and adoption of cutting-edge technology has kept them ahead of the market for years and together with the unlimited design potential released by their newly installed Highcon Euclid they aim to strengthen their design creativity while streamlining the ordering process and further increasing responsiveness to customers.

Press release: Boutwell Owens Installs First Highcon Beam in the USA

The Highcon Beam is already up and running at Boutwell Owens and we hope to keep you updated about their progress. Meanwhile, see the press release from October 10th.

"Boutwell Owens has proven to the market just what Highcon digital technology is capable of and made a name for themselves especially in the ability to deliver high quality short run packaging with rapid turnaround. The addition of the Highcon Beam to complement their conventional manufacturing capability will allow them to apply the same benefits to high volume production."

Ron Kukla, Highcon Sales Director, Americas

Inspiration from Pinterest

One of the easiest and most accessible ways of checking out what's hot and what's not is by searching on Pinterest. Highcon has a very active Pinterest account with thousands of pins on over 60 different boards. We thought it would be fun to pull together some ideas for our customers and partners - so we put together this quick glimpse at innovative and inspiring products that could easily be made on Highcon machines.

Take Me There

Till next time, Happy Halloween to you all!

The Highcon Team
