

# UNLEASHING

The Power of Paper at drupa.

What do you do with your print make-ready sheets today? With Highcon's 3D modeling capability you can turn your waste into premium products.

## Highcon 3D applications

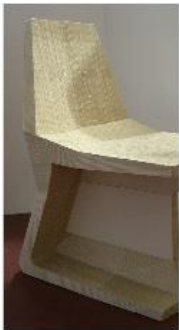

This is yet another application solution you can expect to see at drupa 2016 on the **Highcon booth C50 in Hall 9.**

The Highcon™ Beam and the Highcon Euclid III digital cutting and creasing machines both come with an optional 3D

Modeling add-on that allows you to manufacture amazing products.

The cutting can be made using variable data for each single sheet. There is no need for any previous knowledge of 3D printing. The

potential applications are wide-ranging: POP / POS / Stands / Display / Furniture / Molds for concrete!

Another exciting implementation of Highcon technology is in the fashion world - check out the paper dress in the banner at the top of this mail. To learn more about this, [watch the video](#) with Merav Peleg, Conceptual Paper Designer.

If you are interested in seeing more of what the Highcon technology can do, order a free limited

edition sample kit to be picked up at drupa.
