

Graph Expo 2015

August 19th, 2015

Don't miss Highcon at Graph Expo! At booth #1939 you will get a chance to see just what digital cutting and creasing can do for you.

Real customer jobs and stories.

On our booth, you will not only see real products made by our customers but you will also be able to hear from our customers about how the Highcon™ Euclid has helped their business. To learn more about just how digital finishing eliminates the production bottleneck while simultaneously releasing design freedom, check out the following two articles.

[Refining Packaging Cycle Time: The “Last Mile” Power of Digital](#)

[Taking paper to the next level](#)

The latest in the Highcon Euclid II series of digital cutting and creasing machines is the Euclid II S.

The Euclid II S offers customers the efficiency of an end to end digital solution and can be upgraded to a full Highcon Euclid II or II+. For more details, download the spec sheet.

Highcon Axis web-to-pack solution

The Highcon Axis web-to-pack 2D to 3D platform completes the end-to-end digital flow for printers and converters.

Come see the demo and discover the benefits:

- Design creativity released
- Brand consistency throughout the process
- Improved speed to market
- End-to-end digital process
- Production agnostic
- Zero footprint – cloud based
- Web or mobile front end

Peter Dahmen, paper artist extraordinaire will be appearing live at the Highcon booth, sharing the secrets of his amazing popup designs. Don't miss it!

We'd love to meet you and tell you more. Click here to set up a meeting with one of our representatives HighconNA@Highcon.net or contact our sales team:

Grieg Heimbuch
