

Highcon Updates

August 31st, 2015

Following our last mail, we have some more interesting news for you!

New on YouTube - Lasse Svard of Gafs Kartong talking about the Highcon Euclid:

"I mean, we are a producing company. For us – the production time, the speed, the setup time, that is key for us; you don't have to invest in a tool anymore. We can basically change the structural design up until the last minute of production, so – shorter time to market, and shorter time span with everything. We can basically produce five minutes after we have got the "okay" from the customer".

[See the video - click on the link](#)

If you would like to hear more from other customers, how digital finishing eliminates the production bottleneck while simultaneously releasing design freedom, you can also register for the upcoming webinar on **Wednesday, September 2nd at 8 pm CET on WhatTheyThink** - <http://whattheythink.com/webinars/186/>

Check out the following two articles that recently appeared:

[Refining Packaging Cycle Time: The "Last Mile" Power of Digital](#)

[Taking paper to the next level \(whattheythink\)](#)

Looking forward to telling you more about the Highcon Euclid and the great value it adds to your printed products in our next update.
