

HIGHCON HIGHLIGHTS

February 2018

Dear John,

There's lots of news this month from Highcon and from our customers. At Highcon we're really excited about our latest machine, the Highcon Euclid IIIC digital cutting and creasing machine for corrugated stock.

Highcon Launches Euclid IIIC for Corrugated

A few days ago we announced the launch of the Highcon Euclid IIIC. This latest machine extends the range of the 3rd generation Highcon Euclid cutting and creasing machines into the world of corrugated and fluted substrates from 1 mm up to 3mm/ 40-120pt. **"We have been using the Highcon digital cutting and creasing technology to produce high quality short run packaging on demand for our customers. The ability to produce small to medium size batches just-in-time with low entry cost, allows our customers to order what they actually want."**

Silvano Gauch, President, LxBxH
